WORK EXPERIENCES

Digital Network Associate

Jul 2024 – Present

I.T Department

Nationlink/Infoserve Inc.

- Developed and maintained business intelligence and CRM web applications using ASP.NET MVC/Core and Web API, integrating interactive dashboards and automated email notifications.
- Performed NOC duties ensuring 24/7 system uptime for ATM, POS, and EMV networks; generated and published daily performance reports for internal analytics.

PROJECTS

KinderPal | C#, Unity, Blender

- Developed KinderPal, a mobile-based learning app for Barangay 740 Day Care Center, integrating AR and 3D-rendered objects to offer a comprehensive and engaging educational experience for children.

ICTowers | C#, Unity

- Developed ICTowers, a mobile platform arcade game aimed at IT education, featuring resource collection, level unlocking, and educational content presented in a visually appealing pixel art style.

Finance Management Console | C#, Blazor, .NET Framework

- Developed a Finance Management Console (FMC) — a full-stack web application built With Blazor/.NET that centralizes financial operations for multi-branch organizations, featuring e- money account management, payroll processing, wallet management, role-based dashboards, and email notifications via a RESTful API architecture.

QR Report Generator | C#, WinForms, .NET Framework, Crystal Reports

- Developed a windows desktop application that automates QR payment transaction reporting by extracting data from a live payment switch database and generating financial reports (daily summaries, merchant activity, fee distributions) for operations and finance teams across the organization's merchants network.

EDUCATION

Bachelor of Science in Information Technology

Graduated: August 2024

Universidad de Manila

659-A Cecilia Muñoz St, Ermita, Manila

College of Engineering and Technology
